

# Public Meeting - Mill Brook Restoration Projects

## *Southern Windsor County Regional Planning Commission*

**Monday, December 14<sup>th</sup> at 6 pm**

**American Precision Museum, 196 Main St, Windsor, Vermont**

The Southern Windsor County Regional Planning Commission is hosting a public meeting to introduce a number of flood resiliency projects on the Mill Brook. Fitzgerald Environmental Associates, LLC performed a stream geomorphic assessment on the Mill Brook, which was completed in May of 2015. The assessment includes project recommendations regarding flood resiliency, stream bank stabilization, stormwater management, etc.

Core members from the Towns of Reading, Windsor and West Windsor, in partnership with the Southern Windsor County Regional Planning Commission, selected 5 to 6 of these projects within each of the towns that were considered to be the most feasible for implementation. The projects chosen for implementation will be funded through a High Meadows Fund Grant. The purpose of this meeting will be to introduce the projects to the public and give community members an opportunity to learn about, discuss, and prioritize them.
