New Rider Survey for The Current Bus Routes in Springfield, Ludlow, Bellows Falls, Cavendish and Chester

Southeast Vermont Transit (often known as “The Current”) has just started a project to evaluate the buses it runs in the Springfield/Ludlow/Bellows Falls area. The majority of this project will focus on a survey of existing and potential bus riders in the area – which will be available 1/4/2016 through 1/24/2015. It is hoped that through this input we will identify small improvements to existing routes so they can increase ridership and decrease cost.

The following bus routes are included in this project:

- Springfield In-Town (#1)
- Bellows Falls In-Town (#2)
- Bellows Falls to Springfield (#55)
- Bellows Falls to Ludlow (and Rutland) (#57)
- Bellows Falls to Okemo (#61) (seasonal)

For more information about the project, as well as a link to the online survey, see www.swcrpc.org.

For more information on existing bus routes, see www.crtransit.org

Thank you.
