

# Homeless Population in the Southern Windsor Region

Homelessness is hard to quantify within an area. We have information from three sources:

Vermont 2-1-1 receives requests for emergency shelter/housing. The numbers on this sheet are for the area covered by the Springfield District Office (data via email from Vermont 2-1-1).

The opening of the **Springfield Warming Shelter** a few years ago shows there is a need for shelter during winter months. The numbers shown on this sheet are individual people per season who used the Shelter. For more information visit <https://www.facebook.com/springfieldwarmingshelter/>

The **“Point-In-Time Count”** is carried out one night in January communities around the USA try to count the number of people who are homeless whether they are in a shelter or not. The numbers on this sheet are for Windsor County. For more information visit <http://helpingtohousevt.org/pointintime/>
